RESULTS · PRIORITIES · MEASURES

Website audit

seitenreport.de

Your website at a glance: technical quality, visibility and concrete next steps. With test values and detailed lists as a basis for implementation.

From analysis to your next decision

Start with the short assessment and the prioritized actions. For implementation, you will find the associated findings, URLs and resources in the detailed notes.

OPTIMISATION LEVEL	ANALYSED URLS	INDIVIDUAL CHECKS	OF WHICH:
97 / 100	**1,471**	**301,090**	**284,891**

URL and resource details: attachment directory on page 3

Look up details targeted

All stored findings, URLs and resources in the attachment.

COMPLEMENTARY DETAILANCE		SEITE
A	Check catalogue and all finding types	55
B	Accessibility, Core Web Vitals and GDPR	99
C	All URLs, test values and assignment of findings	438
D	Complete URL score matrix	789
E	All HTTP resources and forwardings	880
F	Keywords, Density and Theme Focus	1329
G	Backlinks, link texts and competition opportunities	1490
H	Additional queried keyword ideas	1491
I	Change history and KPI comparison	1492
J	Internal link strength and distribution	1493

How to Work with the Report

Chapters and page numbers are clickable. The foot area leads back.

U1, U2, etc. refer to URLs in the C directory. U1-U20 includes all 20 URLs.

In the score matrix and link distribution, U-numbers lead directly to the URL entry.

Mistakes: need for action. Warning: check. OK: passed. N/A: not applicable.

External samples and uncollected data are expressly marked.

01

SUMMARY ASSESSMENT

Short assessment and priorities

The most important indicators, risks and next steps at a glance.

301,090 individual checks evaluated

On 1,471 URLs and website level · 65 Website indicators

Evaluated results are counted. Test values which are not applicable or not evaluated are excluded.

OPTIMISATION LEVEL
97%

ERROR TYPES
26
7,926 Total errors

WARNING TYPES
89
8,273 Total warnings

CHECKS PASSED
198
284,891 individual checks passed

A type of finding can affect several URLs. Total errors and total warnings count all hits; a check can give different results per URL.

OPEN SCORE POTENTIAL
+2.7

TOP 5 MEASURES
+1.6

PLANNABLE TARGET SCORE
97%→approx. 99%

The score potential simulates fully passed open checks with the same weights as the website score. It is not a forecast for rankings, traffic or sales; the actual new score is only confirmed by a re-check.

To begin with: the main types of findings

1. **caching for static assets (cache-control, etag/last-modified)** · Widespread URL pattern · Score potential +0.5
2. **Nested interactive elements** · 872 URLs affected · Score potential +0.4
3. **Cache-control headers are available** · Widespread URL pattern · Score potential +0.3
4. **Broken links (site-wide) detected** · Widespread URL pattern · Score potential +0.2

You can find measured values, affected URLs and test goals in "Prioritized findings" and in the action plan. Both chapters can be reached directly via the table of contents.

02

WEBSITE INDICATORS

Inventory, visibility, backlinks and brand signals

The indicator sheet condenses website inventory, audit quality, ranking and reputation signals with source and measurement status.

SEO-WEBSITE-SCORE **97,0%** Audit-Score · gemessen	**AI READINESS** **98,0%** KI-relevante Audit-Signale · gemessen	**ANALYSED URLS** **1.471** Crawl · gemessen
FOUND URLS **1.461** Sitemap vollständig · exakt gemessen	**REFERRING DOMAINS** **–** Backlinkdaten · Premium	**ORGANIC KEYWORDS** **–** Keyword-Sample · Not available
CRITICAL/HIGH DISEASE TYPES **0** Audit-Summary · gemessen	**WEAKEST AREA** **17,0%** Barrierefreiheit Audit · gemessen	**SELECTED FOR THE CRAWL** **1.471** Crawl-Liste · gemessen

All website indicators

Characteristics/range	Value	Source/Measurement status	Classification
Management-Kennzahlen **SEO-Website-Score**	**97,0%**	Audit-Score gemessen	Overall score from assessed audits.
Management-Kennzahlen **AI readiness**	**98,0%**	KI-relevante Audit-Signale gemessen	Technical, structural and substantive comprehensibility for AI and LLM systems.
Management-Kennzahlen **Analysed URLs**	**1.471**	Crawl gemessen	URLs that were stored in the audit with test results.
Management-Kennzahlen **Found URLs**	**1.461**	Sitemap vollständig exakt gemessen	Deduplicated from robots.txt, sitemap index and sitemap files.
Management-Kennzahlen **Referring domains**	**–**	Backlinkdaten Premium	External domains that link to this website.
Management-Kennzahlen **Organic Keywords**	**–**	Keyword-Sample Not available	Found organic keywords or loaded keyword sample.
Management-Kennzahlen **Critical/high disease types**	**0**	Audit-Summary gemessen	Open test types with high or critical priority.

Characteristics/range	Value	Source/Measurement status	Classification
Management-Kennzahlen **Weakest area**	**17,0%**	Barrierefreiheit Audit gemessen	Lowest category score in the current audit.
URL-Inventar **Selected for the crawl**	**1.471**	Crawl-Liste gemessen	
URL-Inventar **Remaining URLs**	**–**	Sitemap-Abdeckung Not available	
URL-Inventar **Sitemap-Dokumente**	**2**	Sitemap-Index gemessen	
URL-Inventar **Sitemap-Childs**	**0**	Sitemap-Index gemessen	
URL-Inventar **Sitemap-Abrufprobleme**	**0**	Sitemap-Audit gemessen	
Audit-Qualität **error types**	**26**	Check-Summary gemessen	
Audit-Qualität **warning types**	**89**	Check-Summary gemessen	
Audit-Qualität **Total errors**	**7.926**	Treffer gemessen	
Audit-Qualität **Total warnings**	**8.273**	Treffer gemessen	
Indexierung & Technik **robots.txt is available**	**ja**	robots.txt gemessen	
Indexierung & Technik **Sitemaps in robots.txt**	**2**	robots.txt gemessen	
Indexierung & Technik **Sitemap URLs wrong host**	**0**	Sitemap-Audit gemessen	
Indexierung & Technik **Noindex in Sitemap**	**0**	Sitemap-Audit gemessen	
Indexierung & Technik **Canonical-Abweichungen**	**0**	Sitemap-Audit gemessen	
Indexierung & Technik **Recognized system**	**–**	CMS-Erkennung Not available	
Content & Onpage **Duplicate-title clusters**	**4**	Content-Muster gemessen	
Content & Onpage **Duplicate description cluster**	**3**	Content-Muster gemessen	

Characteristics/range	Value	Source/Measurement status	Classification
Content & Onpage **Near-duplicate cluster**	**4**	Content-Muster gemessen	
Content & Onpage **Thin listing pages**	**0**	Content-Muster gemessen	
Content & Onpage **Content-Fokus**	**99,0%**	Keyword-Analyse gemessen	Local score of keyword density, clarity of topics, focus matching and internal competition.
Content & Onpage **Evaluable content URLs**	**1.462**	Keyword-Analyse gemessen	Analyzed URLs with enough main content for keyword and topic profiles.
Content & Onpage **Keyword Repeats**	**31**	Keyword-Dichte gemessen	URLs with strikingly high repetition of individual terms or phrases.
Content & Onpage **Internal Keyword Competition**	**20**	Content-Fokus gemessen	Topics where multiple URLs are likely to compete for the same search intention.
Content & Onpage **Unclear Keyword Focus URLs**	**6**	Fokus-Abgleich gemessen	URLs whose title/H1 focus is not clearly recognizable in the main content.
Interne Links **Orphan Pages**	**226**	Interne Links gemessen	
Interne Links **Weakly internally linked**	**509**	Interne Links gemessen	
Rankings & Markt **Top 10 Keywords**	**–**	Rankingdaten Not available	
Rankings & Markt **Traffic estimation**	**–**	Rankingdaten Not available	
Rankings & Markt **Keyword opportunities**	**–**	Position 4-20 Not available	
Rankings & Markt **Lost Keywords**	**–**	Domain-Rank Not available	
Rankings & Markt **Wettbewerber-Gap**	**–**	SERP-Wettbewerber Not available	
Offpage SEO **Total backlinks**	**–**	Backlinkdaten Premium	External links to the website as a total value.
Offpage SEO **Classified backlinks**	**–**	Backlink-Klassifizierung Premium	Quality classification of premium analysis for up to 100.000 backlinks.
Offpage SEO **Strong backlinks**	**–**	Backlink-Klassifizierung Premium	Backlinks with high rank/authority effect and inconspicuous spam signal.

Characteristics/range	Value	Source/Measurement status	Classification
Offpage SEO **Normal backlinks**	–	Backlink-Klassifizierung Premium	Solid backlinks without a clear strong or risk signal.
Offpage SEO **Weak backlinks**	–	Backlink-Klassifizierung Premium	Backlinks with low authority or weak quality signal.
Offpage SEO **Risky backlinks**	–	Backlink-Klassifizierung Premium	Backlinks with broken, lost or flashy spam signal.
Offpage SEO **Reference pages**	–	Backlinkdaten Premium	Individual external pages with a link to the website.
Offpage SEO **Backlink subnetworks**	–	Backlinkdaten Premium	Different IP subnetworks of the referring link sources as a backlink diversity signal.
Offpage SEO **Referring IPs**	–	Backlinkdaten Premium	Different IP addresses of the linking sources.
Offpage SEO **Backlink-Rank**	–	Backlinkdaten Premium	Scaled backlink authority value of the domain.
Brand & Social **Found social profiles**	–	Social-Profile Not available	Found social profiles or social graph URLs of the domain.
Offpage SEO **Classified domains in the sample**	–	Domain-Sample Premium	Number of loaded backlink domains that have been classified into quality classes.
Brand & Social **Social Media Mentions**	–	Mention-Quelle Not available	Only visible if real mention data is stored in the analysis.
Offpage SEO **Strong backlink domains in the sample**	–	Domain-Sample Premium	Referencing domains with high rank effect in the loaded sample.
Offpage SEO **Normal backlink domains in the sample**	–	Domain-Sample Premium	Referring domains in the loaded sample without a clear strong or risk signal.
Brand & Social **Social-Graph-URLs**	–	Social-Profile Not available	Number of recognized social graph URLs from the technology source.
Offpage SEO **Weak backlink domains in the sample**	–	Domain-Sample Premium	Reference domains with low authority in the loaded sample.
Offpage SEO **Risky backlink domains in the sample**	–	Domain-Sample Premium	Referring domains with spam, lost or broken signal in the loaded sample.

Characteristics/range	Value	Source/Measurement status	Classification
Offpage SEO **Broken backlinks**	–	Backlinkdaten Premium	External links that currently point to erroneous targets.
Offpage SEO **Externally linked broken pages**	–	Backlinkdaten Premium	Erroneous landing pages that can lose external link signals.
Offpage SEO **Backlink-Spam-Score**	–	Backlinkdaten Premium	Risk indicator for conspicuous external link patterns.
Offpage SEO **Dofollow-Anteil**	–	Backlinkdaten Premium	Proportion of reference pages without nofollow signal.
Offpage SEO **Anchor-Datenpunkte**	–	Anchor-Analyse Premium	
Technologie & Trust **Identified technologies**	–	Technologie-Erkennung Not available	Detailed counting of recognized website technologies.
Offpage SEO **Generic anchors**	–	Anchor-Analyse Premium	
Technologie & Trust **Recognized contact emails**	–	Technologie-Erkennung Not available	Contact information from the technology source.

03

AUDIT DIAGRAMS

Scores, categories and URL risks in comparison

The diagrams condense the measured audit values and make the center of gravity, distribution and weakest areas immediately comparable.

Assessment profile

Website total value and technical AI comprehensibility dimensions

Overall website assessment	97%
AI technical comprehensibility	98%
Technical reliability	97%
Clarity of content	98%

Status distribution of all rated checks

Errors, warnings and passed checks on all analyzed URLs

7,926 Errors **8,273** Warnings **284,891** passed

Non-applicable tests are not counted as a quality value in this distribution.

Weakest audit categories

Weighted category scores, ascending by rating

Accessibility audit	17%	+0.7
Links (internal/external)	58%	+0.2
GDPR and Tracking Audit	59%	+0.0
Core Web Vitals Audit	74%	+0.0
Social media	74%	+0.2
Performance and CWV	77%	+0.8
Internal linking	87%	+0.2
Security and Headers	93%	+0.2
Meta and SERP	97%	+0.1

URL scores with the greatest need for action

Weakest URLs analyzed by weighted website score

/assets/downloads/seo-audit-beispiel-datenmappe.xlsx	87%
/studien/h1-struktur-benchmark	96%
/studien/meta-robots-noindex-benchmark	96%
/studien/seo-benchmark-daten	96%
/studien/content-security-policy-benchmark	96%
/studien/alt-text-benchmark	96%
/studien	96%

Methodology: Category and URL scores are weighted from the applicable checks. Errors receive no points, warnings depending on the severity of points and passed exams the full weighting. The score potential shows the still achievable share in points of the

> overall score.

04

VISIBILITY ISSUES

What is currently slowing down visibility the most?

This section condenses technical and substantive individual findings into overarching causes.

MEDIUM · 1468 Signals

caching for static assets (cache-control, etag/last-modified)

high

HIGH · 872 Signals

Nested interactive elements

high

MEDIUM · 1468 Signals

Cache-control headers are available

high

MEDIUM · 1335 Signals

Broken links (site-wide) detected

high

MEDIUM · 1471 Signals

X-Content-Type Options is nosniff

high

Interpretation: Visibility brakes are not isolated single errors, but patterns that often affect multiple URLs, templates or processes.

05

ACTIONS BY EFFORT

Rapid improvements and structural measures

Not every measure has the same effort. This separation helps with planning, budgeting and implementation.

Rapid improvements

Measures with usually manageable effort and fast visible improvement.

- Complete missing or weak meta descriptions on prioritized pages.
- Correct internal links to 404 or redirect targets.
- Check and clean up H1/Title issues on important landing pages.
- Check for obvious indexing and canonical issues in the URL priority list.

Structural measures

Measures that often concern template, CMS, process or architecture topics.

- caching for static assets (cache-control, etag/last-modified)
- Nested interactive elements
- Cache-control headers are available
- Broken links (site-wide) detected
- X-Content-Type Options is nosniff
- IPv6 (AAAA) is available
- Open graph base tags are available

Recommended order

First implement rapid improvements with high impact, then solve structural causes in the template, CMS or editorial process. This prevents the same problems from arising again with new pages.

06

TECHNICAL SEO QUALITY

Technical risks and crawl comprehensibility

Technical signals determine whether search engines can reliably reach, interpret and index content.

HTTP / ERROR	WARNINGS	PASSED	NOT APPLICABLE
7,926	8,273	284,891	290268
Fault hits	Testable signals	Passed tests	NA signals

Technical test points

- Indexability and crawlability of important pages
- Status codes, forwardings and redirect chains
- Canonical signals and potential contradictions
- Internal links to faulty or weak landing pages
- HTTPS, headers and technical trust signals

Why This Is Important

Technical problems often do not only affect individual sides. When templates, redirects, or indexing logic are affected, a single pattern can affect many URLs.

07

ACCESSIBILITY

Accessibility, operability and robust structure

Automated pre-checking of central WCAG, ARIA, form, keyboard and content structures via the analyzed URLs.

MODULE SCORE	ERRORS	WARNINGS	VALIDATED
17%	8	27	41
	Failure to pass test topics	Concrete testing needs	1470 URLs evaluated

Why this exam is important

Barriers can exclude people from information, contact and buying processes. For many business websites, legal and contractual requirements are added.

Basis of evaluation

1470 analyzed URLs. 76 Test topics · Results 14 Nov 2026 23:28

INDIVIDUAL PROBLEMS	IMAGES CHECKED	FORMS	EXAMINED ON THE LEFT
12216	3213	2591	93246

Main results and next actions

Status	Test subject matter	Affected	Classification and measure
Errors	**Nested interactive elements**	872 URLs	interaktives Element liegt innerhalb eines weiteren interaktiven Elements interaktives Element liegt innerhalb eines weiteren interaktiven Elements **Measure:** Avoid links in buttons, buttons in links, or nested ARIA controls; clearly build interactive targets separately.
Errors	**Form fields without label**	35 URLs	kein Label/aria-label/aria-labelledby kein Label/aria-label/aria-labelledby **Measure:** Link form fields with visible labels or unique ARIA names.
Errors	**ARIA references without target**	9 URLs	aria-controls verweist auf fehlende ID: websiteGalleryDialog aria-controls verweist auf fehlende ID: websiteGalleryDialog **Measure:** Make sure all aria-labelledby, aria-describedby and control references point to existing IDs.

Methodology & limitations: Automatisierte HTML-, WCAG- und ARIA-Prüfungen. Dieselbe Antwort wie im SEO-Crawl; keine zusätzlichen Browser- oder Nutzermessungen. Automatisierte Vorprüfung. Eine vollständige WCAG-/BFSG-Bewertung benötigt zusätzlich manuelle Tests mit Tastatur, Screenreader und fachlicher Inhaltsprüfung. Nicht auswertbare URLs: 1.

08

GDPR & TRACKING

Consent, tracking and data protection signals

Technical review of detected trackers, consent signals, forms, third-party providers, storage usage and uncertain resources.

MODULE SCORE	ERRORS	WARNINGS	VALIDATED
59%	3	9	36
	Failure to pass test topics	Concrete testing needs	1470 URLs evaluated

Why this exam is important

Lack of consent control, unknown third-party providers or insecure forms can damage trust and trigger legal or organizational risks.

Basis of evaluation

1470 analyzed URLs. 48 Test topics · Results 14 Nov 2026 23:28

TRACKER/SERVICES	CONSENT SYSTEMS	FORMS	EXTERNAL HOSTS
0	5	1360	7

Main results and next actions

Status	Test subject matter	Affected	Classification and measure
Errors	**Lead, contact and login forms**	1229 URLs	Formulare auf 1229 geprüften Seite(n) gefunden, insgesamt 1360 Formular(e). 1136 Seite(n) mit Formularen ohne klaren Datenschutz-/Einwilligungshinwei... **Measure:** Check form purpose, mandatory fields, data protection notice, CRM/newsletter connection, double opt-in and server/tag sharing.
Errors	**Accept visibly, do not refuse**	648 URLs	648 Seite(n) mit Akzeptieren-Signal, aber ohne klares Ablehnen-Signal. **Measure:** Ensure that Reject or Only Necessary Selection is at least as easy to reach as Accept.
Errors	**Mixed content and uncertain resources**	8 URLs	8 http-Ressource(n) gefunden. **Measure:** Replace http resources and insecure form targets with HTTPS to avoid data leakage, browser alerts, and consent/trust issues.

Methodology & limitations: Statische HTML-Prüfung von Tracking-, Formular- und Einbindungssignalen. Dieselbe Antwort wie im SEO-Crawl; keine zusätzlichen Browser- oder Nutzermessungen. Technical preliminary examination, no legal advice. Consent-Flows, Rechtsgrundlagen und Verträge müssen fachlich geprüft werden. Nicht auswertbare URLs: 1.

09

CORE WEB VITALS

Loading time, interaction load and layout stability

Server, HTML and resource measurements show performance risks, recurring template patterns and concrete technical leverage.

MODULE SCORE	ERRORS	WARNINGS	VALIDATED
74%	1	17	26
	Failure to pass test topics	Concrete testing needs	1470 URLs evaluated

Why this exam is important

Slow or unstable pages increase jumps and friction in important user paths. Recurrent template causes can affect many URLs at the same time.

Basis of evaluation

1470 analyzed URLs. 44 Test topics · Results 14 Nov 2026 23:28

LCP READINESS Ø	INP-READINESS Ø	CLS READINESS Ø	TTFB P75
84%	95%	98%	109 ms

Main results and next actions

Status	Test subject matter	Affected	Classification and measure
Errors	**Page types with recurring performance patterns**	3 URLs	12 Template-Gruppe(n) wurden aus den geprüften URLs gebildet. Most striking group: /forum/google/:slug with Score 93 and 106 URL(s). **Measure:** Performance does not process URL by URL, but bundle by page type: fix common components, hero images, CSS/JS packages and tracking per template.
Warning	**Preload strategy for critical resources**	1458 URLs	1458 URL(s) mit frühen Bildern, CSS- oder Font-Signalen ohne Preload-Kandidaten. **Measure:** Use preload specifically for hero images, critical fonts, or central style sheets, but avoid broadly distributed preload lists.
Warning	**Largest-contentful-paint risk indicators**	1453 URLs	140 URL(s) haben LCP-Readiness-Status warn/fail. No URL above 2 MB of known weight. **Measure:** Optimize Hero Image, Critical CSS, Server Response, Preload/Fetch Priority, and Unneeded Resources per Template. In particular, suspected LCP images do not load lazy.

Methodology & limitations: Gemessene Serverantwort und technische LCP-/INP-/CLS-Risikobewertung. Dieselbe Antwort wie im SEO-Crawl; keine zusätzlichen Browser- oder Nutzermessungen. Technische Performance-Vorprüfung. Die Readiness basiert auf Server-, HTML- und Ressourcensignalen; echte CrUX-, Lighthouse- und Browser-Feldwerte müssen separat verifiziert werden. Nicht auswertbare URLs: 1.

10

CONTENT AND SEARCH RESULTS

Comprehensible content and clear search results

Title, description, H-structure and page structure influence how clearly content is classified by search engines and AI systems.

Clarity of content

- Is the main message of the page in the title and H1 clear?
- Is the search intention visibly served?
- Are headings logically structured?
- Is there enough context to offer, company, target group or location?
- Are important sides semantically distinguishable from each other?

Assessment of clarity of content

98

Evaluates whether titles, headings, content and page structure are clearly interpretable for search engines.

Typical optimization levers

- Title tags focus more on topic, performance, brand or search intention.
- Formulate meta descriptions individually and make click benefits more visible.
- Standardize H1/H2 structure for each type of page.
- Enrich service pages with context to the company, offer, region and target group.

11

TRUST AND COMPANY PROFILE

Trust and company signals

For company websites, clear trust, contact and company signals are important so that search engines and AI systems can better rank the website.

Signal	Status	Recommendation
HTTPS / technical security	gut	Check HTTPS, Mixed Content, Header and Reachable Resources.
Imprint / Contact / Company data	solide	Represent company data clearly, consistently and easily findable.
Organization / LocalBusiness Scheme	Existing/checking	Complement structured data for company, location and contact information.
Corporate context	solide	Clearly connect services, brand, people, location and themes.

Trust signals

- HTTPS and technically clean delivery
- Imprint, contact, company data
- Consistent NAP data at local businesses
- Organization or LocalBusiness Award

Company signals

- Clear brand and company name
- Unique assignment of performance and topics
- Structured internal link
- Machine-readable link from company, offer and location

12

PRIORITIZED FINDINGS

Findings by priority

The most important issues from the audit, sorted by effect, frequency and technical relevance.

1

MEDIUM **caching for static assets (cache-control, etag/last-modified)** · Widespread URL pattern

Score potential: +0.5 Points · Impact high

Measured	Target status
No / absent	**Yes / present**

Recommendation Set cache control and ideally fit ETag or Last-Modified for assets/HTML.

Risk in case of non-remediation: If the pattern persists, the mobile user experience can remain weaker and important entries lose unnecessarily stability. Since many evaluated URLs are affected, a single template or process problem can scale further.

Example URLs:

- https://seitenreport.de/
- https://seitenreport.de/premium
- https://seitenreport.de/seo-software

2

HIGH **Nested interactive elements** · 872 URLs affected

Score potential: +0.4 Points · Impact high

Determination	Target status
872 URLs affected	**Nested interactive elements**

Recommendation Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there.

Risk in case of non-remediation: If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.

Affected URLs:

- https://seitenreport.de/
- https://seitenreport.de/
- https://seitenreport.de/

3

MEDIUM **Cache-control headers are available** · Widespread URL pattern

Score potential: +0.3 Points · Impact high

Measured	Target status
Not available	**Existing**

Recommendation Set caching policy (minimum for static assets).

Risk in case of non-remediation: If the pattern persists, the mobile user experience can remain weaker and important entries lose unnecessarily stability. Since many evaluated URLs are affected, a single template or process problem can scale further.

Example URLs:

- https://seitenreport.de/
- https://seitenreport.de/premium
- https://seitenreport.de/seo-software

4

MEDIUM **Broken links (site-wide) detected** · Widespread URL pattern

Score potential: +0.2 Points · Impact high

Determination	Target status
Widespread URL pattern	**Broken links (site-wide) detected**

Recommendation Perform link check (crawler) and fix.

Risk in case of non-remediation: If the pattern persists, relevant pages can be crawled worse, later indexed or incorrectly prioritized. Since many evaluated URLs are affected, a single template or process problem can scale further.

Example URLs:

- https://seitenreport.de/forum/onpage-optimierung/navigationsmenue-links-entfernen-368312
- https://seitenreport.de/
- https://seitenreport.de/premium

5

MEDIUM **X-Content-Type Options is nosniff** · Website-wide template

Score potential: +0.2 Points · Impact high

Measured	Target status
No / absent	**Yes / present**

Recommendation Set X-Content-Type Options explicitly to nosniff.

Risk in case of non-remediation: If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted. Since many evaluated URLs are affected, a single template or process problem can scale further.

Example URLs:

- https://seitenreport.de/
- https://seitenreport.de/premium
- https://seitenreport.de/seo-software

6

LOW **IPv6 (AAAA) is available** · System-wide finding

Score potential: +0.2 Points · Impact high

Measured	Target status
No / absent	**Yes / present**

Recommendation Deploy IPv6 in DNS (AAAA Record) – optional but recommended.

Risk in case of non-remediation: If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted. Since it was detected system-wide, the cause is expected to remain centrally effective.

Example URLs:

- https://seitenreport.de/
- https://seitenreport.de/premium
- https://seitenreport.de/seo-software

7

MEDIUM **Open graph base tags are available** · 649 URLs affected

Score potential: +0.2 Points · Impact high

Measured	Target status
No / absent	**Yes / present**

Recommendation og:title, og:type, og:image, og:url.

Risk in case of non-remediation: If the pattern persists, important content remains less accessible or internal signals are bundled weaker.

Affected URLs:

- https://seitenreport.de/ai-visibility-check
- https://seitenreport.de/google-ai-overview-check
- https://seitenreport.de/services/technische-seo-optimierung

8

MEDIUM **Internal links point to redirects (Linkjuice/Performance)** · 984 URLs affected

Score potential: +0.1 Points · Impact high

Determination	Target status
984 URLs affected	**Internal links point to redirects (Linkjuice/Performance)**

Recommendation For Auto: Extend outgoing link fetch/status in postprocess (already available is L67 Sample).

Risk in case of non-remediation: If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.

Affected URLs:

- https://seitenreport.de/forum/google/speaking-urls-364628
- https://seitenreport.de/forum/google/zweimal-platz-1-bei-google-365689
- https://seitenreport.de/forum/htaccess/htaccess-fuer-viele-domains-366082

9

MEDIUM **Skip link to main content** · 753 URLs affected

Score potential: +0.1 Points · Impact high

Determination	Target status
753 URLs affected	**Skip link to main content**

Recommendation Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there.

Risk in case of non-remediation: If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.

Affected URLs:

- https://seitenreport.de/premium
- https://seitenreport.de/seo-software
- https://seitenreport.de/referenzen

10

MEDIUM **Title Length (30–60)** · 506 URLs affected

Score potential: +0.1 Points · Impact high

Measured	Recommended area
Beispielspanne 61–80 Zeichen	**30–60 characters**

Recommendation Keep title concise and in the target area.

Risk in case of non-remediation: If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.

Affected URLs:

- https://seitenreport.de/seo-software
- https://seitenreport.de/agenturen
- https://seitenreport.de/widgets

11

LOW **New windows without notice** · Website-wide template

Score potential: +0.1 Points · Impact high

Determination	Target status
Website-wide template	**New windows without notice**

Recommendation Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there.

Risk in case of non-remediation: If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist. Since many evaluated URLs are affected, a single template or process problem can scale further.

Example URLs:

- https://seitenreport.de/
- https://seitenreport.de/
- https://seitenreport.de/

12

MEDIUM **Same link text with different goals** · 354 URLs affected

Score potential: +0.1 Points · Impact high

Determination	Target status
354 URLs affected	**Same link text with different goals**

Recommendation Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there.

Risk in case of non-remediation: If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.

Affected URLs:

- https://seitenreport.de/agenturen
- https://seitenreport.de/agenturen
- https://seitenreport.de/agenturen

Important routing chains

Source URL	Hops	HTTP	Final URL
http://duisburg.domäne.de	1	301 -> –	

Priority: Fix erroneous HTML, CSS, and JavaScript targets first. Then link individual redirects as directly as possible; shorten longer chains completely to the final destination.

17

URL × SCORE MATRIX

Category scores per URL

This overview prioritizes weak URL category combinations. The complete matrix can be found in Appendix D.

URLS IN MATRIX	Ø WEBSITE SCORE	WEAK URLS	SCORE COLUMNS
1471	97%	0	15
20 in this overview:	Weighted average	Less than 60% score	Categories per URL

This overview shows the 20 weakest matrix lines of 1471 analyzed URLs. The full score matrix is in Appendix D of this report.

All category scores are in the full matrix Annex D. There, each U-number leads directly to the test values and findings of the respective URL.

18

PAGE TYPES

Template and page type evaluation

If many problems occur in the same page types, this often speaks for central template or CMS causes.

Page type/pattern	URLs	Ø Score	Errors	Warnings	Priority
Other underside	19	96%	164	81	hoch
Main navigation / landing page	1	96%	9	4	hoch

Interpretation

If errors accumulate in a page type, the underlying template should first be checked. A central correction can improve many URLs simultaneously.

Typical template levers

- Meta-data fallbacks
- Canonical logic
- H1-/Heading structure
- Schema.org edition
- Internal link modules

19

AI TECHNICAL COMPREHENSIBILITY

How good are the technical prerequisites for machine classification?

This section assesses technical, structural and semantic requirements. Actual mentions or source quotes in AI responses are not measured.

AI technical comprehensibility

The value for AI technical readiness is derived from the same technical, structural and content audit signals as in the web view. It does not measure real mentions, source quotes or rankings in AI systems. In this way, you can see where structure, indexing, trust signals or content make machine classification more difficult.

AI TECHNICAL COMPREHENSIBILITY
98
Structure, Context, Schema.org, Trust

TECHNICAL RELIABILITY
97
Indexing, HTTPS, headers, status codes

CLARITY OF CONTENT
98
Title, headings, page structure

01
Technical intelligibility
Checks indexability, canonicals, status codes, internal linking, forwarding, and technical blocks.

02
Structured data
Notes on Schema.org signals such as Organization, LocalBusiness, Breadcrumb, Product, Article or FAQ.

03
Clarity of content
Evaluates whether titles, headings, content and page structure are clearly interpretable for search engines.

04
Trust and company signals
Information about company, contact, imprint, security and machine-readable trust signals.

Example finding
Priorisieren Sie klare Seitentitel, Meta-Daten, strukturierte Daten, Indexierbarkeit und eindeutig crawlbare Inhalte, damit Suchmaschinen und KI-Systeme die Website besser einordnen können.

Structure of results in the audit
- **Technical AI comprehensibility:** Structure, Context, Schema.org, Trust
- **Technical reliability:** Indexing, HTTPS, headers, status codes
- **Clarity of content:** Title, headings, page structure

Note: Seitenreport does not measure guaranteed rankings in ChatGPT, Gemini or Perplexity. The analysis evaluates technical and content requirements so that search engines and AI systems can better understand your website.

20

AI COMPREHENSIBILITY IN DETAIL

Technical AI comprehensibility: Detail matrix

The detailed matrix shows which machine-readable prerequisites are already solid and which should be improved in a targeted manner.

Technical reliability

Indexing, HTTPS, headers, status codes, redirects

Clean up technical blockages and conflicting signals first.

Clarity of content

Title, headings, page structure, search intention

Structure pages more semantically and improve snippets.

Structured Data

Schema.org, Organization, LocalBusiness, Breadcrumb, FAQ, Article

Centrally supplement and validate structured data for each page type.

Trust and Company Profile

Company, contact, imprint, security, machine-readable trust signals

Make trust and company signals more visible and consistent.

Company profile

Brand, offer, local relevance, thematic clusters

Connect entities such as companies, services, location and target group more clearly.

Crawl and Context

Internal linking, indexability, page types, crawl paths

Make important pages more easily crawlable and more contextually accessible.

21

PRIORITY MATRIX

Effect × Effort

The matrix helps to prioritize actions not only by number of errors, but by feasibility and potential impact.

High effect / low effort

Immediately implement

No explicit measures detected in this bucket.

High effect / higher effort

Planning and technically clean implementation

- caching for static assets (cache-control, etag/last-modified)
- Nested interactive elements
- Cache-control headers are available
- Broken links (site-wide) detected
- X-Content-Type Options is nosniff

Lower impact / lower effort

Take with you if you are working anyway

No explicit measures detected in this bucket.

Lower effect / high effort

Defer or evaluate only after follow-up audit

No explicit measures detected in this bucket.

Recommendation: implement measures from “High impact / low effort” first, then plan structural P1/P2 topics and carry out a follow-up audit after implementation.

22

BRIEFING

Developer and editorial briefing

The following to-dos separate technical implementation from editorial optimization and facilitate the transfer to teams or service providers.

TECHNICAL IMPLEMENTATION

Developer briefing

- Check status codes, redirects and potential redirect chains against URL priorities.
- Validate canonical output and indexability for important page types.
- Secure meta-fallbacks in the template so that new pages do not go online without a title/description.
- Clean up internal links on 404, 3xx or non-indexable landing pages.
- prepare Schema.org output technically centrally and controllable per page type.

SUBSTANTIVE IMPLEMENTATION

Editorial briefing

- Align page titles more specifically to search intention, offer and target group.
- Complete meta descriptions for important service, product and advisory pages individually.
- Check H1/H2 structure: Every important page should have a clear main message.
- Seriously sharpen performance pages: clearly name the company, offer, location, target group and benefit.
- Structuring FAQ/advice content to make it easier for search engines and AI systems to identify context.

Transfer Recommendation

P1 technical topics should be implemented through development or agency. Content P1/P2 topics are suitable for editorial, SEO or specialist departments. After implementation, a follow-up audit is recommended in order to make progress and residual problems measurable.

23

ACTION PLAN

Recommended next steps

Concrete measures for handover to SEO, editorial staff, development or external service providers.

Prio	Measure and audit objective	Effort	Score pot.	Owner
P2	**caching for static assets (cache-control, etag/last-modified)** Area: SEO · Effect: medium · Status: open Set cache control and ideally fit ETag or Last-Modified for assets/HTML. **Risk in case of non-remediation:** If the pattern persists, the mobile user experience can remain weaker and important entries lose unnecessarily stability. Since many evaluated URLs are affected, a single template or process problem can scale further. **Actually:** No / absent → **Objective:** Yes / present **Scope:** Widespread URL pattern	M	+0.5	SEO
P1	**Nested interactive elements** Area: SEO · Effect: high · Status: open Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. **Risk in case of non-remediation:** If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist. **Actually:** 872 URLs affected → **Objective:** Nested interactive elements **Scope:** 872 URLs affected	M	+0.4	SEO
P2	**Cache-control headers are available** Area: SEO · Effect: medium · Status: open Set caching policy (minimum for static assets). **Risk in case of non-remediation:** If the pattern persists, the mobile user experience can remain weaker and important entries lose unnecessarily stability. Since many evaluated URLs are affected, a single template or process problem can scale further. **Actually:** Not available → **Objective:** Existing **Scope:** Widespread URL pattern	M	+0.3	SEO
P2	**Broken links (site-wide) detected** Area: SEO · Effect: medium · Status: open Perform link check (crawler) and fix. **Risk in case of non-remediation:** If the pattern persists, relevant pages can be crawled worse, later indexed or incorrectly prioritized. Since many evaluated URLs are affected, a single template or process problem can scale further. **Actually:** Widespread URL pattern → **Objective:** Broken links (site-wide) detected **Scope:** Widespread URL pattern	M	+0.2	SEO

Prio	Measure and audit objective	Effort	Score pot.	Owner
P2	**X-Content-Type Options is nosniff** Area: SEO · Effect: medium · Status: open Set X-Content-Type Options explicitly to nosniff. **Risk in case of non-remediation:** If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted. Since many evaluated URLs are affected, a single template or process problem can scale further. **Actually:** No / absent → **Objective:** Yes / present **Scope:** Website-wide template	M	+0.2	SEO
P3	**IPv6 (AAAA) is available** Area: SEO · Effect: low · Status: open Deploy IPv6 in DNS (AAAA Record) – optional but recommended. **Risk in case of non-remediation:** If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted. Since it was detected system-wide, the cause is expected to remain centrally effective. **Actually:** No / absent → **Objective:** Yes / present **Scope:** System-wide finding	M	+0.2	SEO
P2	**Open graph base tags are available** Area: SEO / Content · Effect: medium · Status: open og:title, og:type, og:image, og:url. **Risk in case of non-remediation:** If the pattern persists, important content remains less accessible or internal signals are bundled weaker. **Actually:** No / absent → **Objective:** Yes / present **Scope:** 649 URLs affected	M	+0.2	SEO/editing
P2	**Internal links point to redirects (Linkjuice/Performance)** Area: Technical SEO · Effect: medium · Status: open For Auto: Extend outgoing link fetch/status in postprocess (already available is L67 Sample). **Risk in case of non-remediation:** If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted. **Actually:** 984 URLs affected → **Objective:** Internal links point to redirects (Linkjuice/Performance) **Scope:** 984 URLs affected	M	+0.1	Dev
P2	**Skip link to main content** Area: SEO · Effect: medium · Status: open Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. **Risk in case of non-remediation:** If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist. **Actually:** 753 URLs affected → **Objective:** Skip link to main content **Scope:** 753 URLs affected	M	+0.1	SEO

Prio	Measure and audit objective	Effort	Score pot.	Owner
P2	**Title Length (30–60)** Area: SEO / Content · Effect: medium · Status: open Keep title concise and in the target area. **Risk in case of non-remediation:** If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted. **Actually:** Beispielspanne 61–80 Zeichen → **Objective:** 30–60 characters **Scope:** 506 URLs affected	M	+0.1	SEO/editing
P3	**New windows without notice** Area: SEO · Effect: low · Status: open Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. **Risk in case of non-remediation:** If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist. Since many evaluated URLs are affected, a single template or process problem can scale further. **Actually:** Website-wide template → **Objective:** New windows without notice **Scope:** Website-wide template	M	+0.1	SEO
P2	**Same link text with different goals** Area: SEO · Effect: medium · Status: open Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. **Risk in case of non-remediation:** If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist. **Actually:** 354 URLs affected → **Objective:** Same link text with different goals **Scope:** 354 URLs affected	M	+0.1	SEO

> Recommendation: implement P1 measures first, document changes and then carry out a follow-up audit. This shows which technical and semantic signals have been improved.

IMPLEMENTATION AND SUPPORT

Implementation support

The audit turns into concrete measures. Seitenreport can assist in prioritization, technical implementation preparation and ongoing improvement.

From audit to continuous SEO improvement

If you want support in the implementation of the recommended measures, Seitenreport is happy to help with prioritization, coordination and monthly SEO support. This audit thus becomes a structured improvement process instead of a one-time error list.

Prioritisation

Evaluation of the most important SEO, technical and AI measures by impact and effort.

Implementation monitoring

Concrete briefings for development, editorial or agency, including inquiry support.

Monthly SEO Care

Recurring check, action plan, progress assessment and next priorities.

Interested in support?

Please send us a request via the contact form on seitenreport.de. We get in touch with an assessment of how we can help with implementation or monthly SEO care.

26

NEXT STEPS

From audit to implementation

The report is intended as a basis for decision-making for prioritization, implementation and follow-up audit.

1. Prioritize

Treat P1 topics with high risk or high visibility first.

2. Implement

Hand over measures to development, SEO or editorial staff and document changes.

3. Follow-up audit

After implementation, re-examine and measure progress in score, findings and technical AI comprehensibility.

Regularly review progress

Analysis → Priority → Implementation → Measurement. Thus, a one-off audit becomes a structured improvement process for classic SEO, technical quality and machine-readable comprehensibility.

Inhalt | Complete audit appendix

This appendix contains all stored types of findings, all analyzed URLs and all collected HTTP resources of this run. U-numbers refer to the full URLs in Appendix C. Number ranges such as U1-U20 include each URL in between. External data and optional additional queries retain their stored scope; samples and unavailable data are marked.

1471 analyzed URLs. 65 Website Key Figures | 113 open types of findings | 3687 HTTP resources

DETAIL AREA	SEITE
A Check catalogue and all finding types	55
B Accessibility, Core Web Vitals and GDPR	99
C All URLs, test values and assignment of findings	438
D Complete URL score matrix	789
E All HTTP resources and forwardings	880
F Keywords, Density and Theme Focus	1329
G Backlinks, link texts and competition opportunities	1490
H Additional queried keyword ideas	1491
I Change history and KPI comparison	1492
J Internal link strength and distribution	1493

A | Check catalogue and all finding types

All evaluated test types with status distribution. Errors and warnings are then explained with the measured value, goal and recommendation for action. Website-wide checks and URL checks have different reference sizes. The URL mapping is in Appendix C.

Category	Score	Classification
Accessibility audit	17%	Potential: 0.71 Points
Links (internal/external)	58%	Potential: 0.23 Points

Finding/effect	Measurement and implementation
X282 | Performance and CWV caching for static assets (cache-control, etag/last-modified) medium | Error: 1468 | Warnings: 0 1.468 von 1.471 ausgewerteten URLs zeigen dieses Signal. If the pattern persists, the mobile user experience can remain weaker and important entries lose unnecessarily stability. Since many evaluated URLs are affected, a single template or process problem can scale further.	Measured: No / absent Target status: Yes / present Set cache control and ideally fit ETag or Last-Modified for assets/HTML. Examples: U1, U2, U3
A11Y_NESTED_INTERACTIVE | Accessibility audit Nested interactive elements high | Error: 872 | Warnings: 0 872 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 872 URLs affected Target status: Nested interactive elements Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1, U1, U1
T85 | Performance and CWV Cache-control headers are available medium | Error: 1468 | Warnings: 0 1.468 von 1.471 ausgewerteten URLs zeigen dieses Signal. If the pattern persists, the mobile user experience can remain weaker and important entries lose unnecessarily stability. Since many evaluated URLs are affected, a single template or process problem can scale further.	Measured: Not available Target status: Existing Set caching policy (minimum for static assets). Examples: U1, U2, U3

A | Check catalogue and all finding types

Finding/effect	Measurement and implementation
L67 | Links (internal/external) Broken links (site-wide) detected medium | Error: 1 | Warnings: 1334 1.335 von 1.470 ausgewerteten URLs zeigen dieses Signal. If the pattern persists, relevant pages can be crawled worse, later indexed or incorrectly prioritized. Since many evaluated URLs are affected, a single template or process problem can scale further.	Determination: Widespread URL pattern Target status: Broken links (site-wide) detected Perform link check (crawler) and fix. Examples: U1329, U1, U2
T114 | Security and Headers X-Content-Type Options is nosniff medium | Error: 1471 | Warnings: 0 1.471 von 1.471 ausgewerteten URLs zeigen dieses Signal. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted. Since many evaluated URLs are affected, a single template or process problem can scale further.	Measured: No / absent Target status: Yes / present Set X-Content-Type Options explicitly to nosniff. Examples: U1, U2, U3
T110 | Technical structure IPv6 (AAAA) is available low | Error: 1471 | Warnings: 0 Recognized centrally at the website/configuration level · Sample URLs serve as proof only. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted. Since it was detected system-wide, the cause is expected to remain centrally effective.	Measured: No / absent Target status: Yes / present Deploy IPv6 in DNS (AAAA Record) – optional but recommended. Examples: U1, U2, U3
M31 | Social media Open graph base tags are available medium | Error: 649 | Warnings: 0 649 von 1.320 ausgewerteten URLs betroffen. If the pattern persists, important content remains less accessible or internal signals are bundled weaker.	Measured: No / absent Target status: Yes / present og:title, og:type, og:image, og:url. Examples: U41, U43, U71
X107 | Internal linking Internal links point to redirects (Linkjuice/Performance) medium | Error: 10 | Warnings: 974 984 von 1.470 ausgewerteten URLs betroffen. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Determination: 984 URLs affected Target status: Internal links point to redirects (Linkjuice/Performance) For Auto: Extend outgoing link fetch/status in postprocess (already available is L67 Sample). Examples: U1131, U1160, U1180

A | Check catalogue and all finding types

Finding/effect	Measurement and implementation
A11Y_SKIP_LINK | Accessibility audit Skip link to main content medium | Error: 0 | Warnings: 753 753 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 753 URLs affected Target status: Skip link to main content Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U2, U3, U6
M22 | Meta and SERP Title Length (30–60) medium | Error: 0 | Warnings: 506 506 von 1.470 ausgewerteten URLs betroffen. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Measured: Beispielspanne 61–80 Zeichen Recommended area: 30–60 characters Keep title concise and in the target area. Examples: U3, U4, U7
A11Y_LINK_NEW_WINDOW | Accessibility audit New windows without notice low | Error: 0 | Warnings: 1470 1.470 von 1.470 ausgewerteten URLs zeigen dieses Signal. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist. Since many evaluated URLs are affected, a single template or process problem can scale further.	Determination: Website-wide template Target status: New windows without notice Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1, U1, U1
A11Y_SAME_LINK_TEXT_DIFFERENT_TARGET | Accessibility audit Same link text with different goals medium | Error: 0 | Warnings: 354 354 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 354 URLs affected Target status: Same link text with different goals Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U4, U4, U4
L79 | Internal linking Avoid Orphan Pages medium | Error: 0 | Warnings: 226 226 von 1.470 ausgewerteten URLs betroffen. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Determination: 226 URLs affected Target status: Avoid Orphan Pages Link all important pages internally. Examples: U166, U904, U1026
T96 | Security and Headers Mixed content excluded low | Error: 382 | Warnings: 0 382 von 1.470 ausgewerteten URLs betroffen. If the signal persists, trust, browser perception or reputation signals can be further burdened.	Measured: Beispielspanne 3–8 Target status: 0 http:// Assets are not included on HTTPS sites. Examples: U1015, U1016, U1017
M24 | Meta and SERP Meta Description Length (120–160) medium | Error: 0 | Warnings: 250 250 von 1.464 ausgewerteten URLs betroffen. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Measured: Beispielspanne 68–166 Zeichen Recommended area: 120-160 characters Description in the SERP-typical range. Examples: U47, U53, U54

A | Check catalogue and all finding types

Finding/effect	Measurement and implementation
X111b | Images and Media Images have width/height medium | Error: 0 | Warnings: 187 187 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, important content remains less accessible or internal signals are bundled weaker.	Measured: Beispielwert 1 Recommended: maximum 0 Set width/height or aspect ratio (reduce CLS). Examples: U6, U21, U22
H60 | Internal linking Content Internal linking makes sense low | Error: 0 | Warnings: 509 509 von 1.470 ausgewerteten URLs betroffen. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Determination: 509 URLs affected Target status: Content Internal linking makes sense Link important pages from strong pages. Examples: U81, U84, U142
A11Y_FORM_LABELS | Accessibility audit Form fields without label high | Error: 35 | Warnings: 0 35 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 35 URLs affected Target status: Form fields without label Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U4, U87, U88
X384 | Keyword & Topic Coverage Avoid keyword cannibalization site-wide high | Error: 0 | Warnings: 55 55 von 1.462 ausgewerteten URLs betroffen. If the pattern persists, multiple URLs can continue to compete for similar search terms and unnecessarily split SEO signals.	Determination: 55 URLs affected Target status: Avoid keyword cannibalization site-wide Merge URLs with a very similar keyword focus, differentiate them neatly or strengthen a main page via internal linking/canonical. Examples: U54, U329, U352
X116d | Performance and CWV Assets are versioned or cache-bustable low | Error: 0 | Warnings: 449 449 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, the mobile user experience can remain weaker and important entries lose unnecessarily stability.	Measured: Beispielspanne 0–0,07 Recommended: Not less than 0,5 % Deliver static assets by hash/version in the filename or query. Examples: U139, U167, U1015
A11Y_ARIA_CURRENT_NAVIGATION | Accessibility audit Current page in navigation low | Error: 0 | Warnings: 313 313 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 313 URLs affected Target status: Current page in navigation Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U2, U2, U2
A11Y_SVG_NAME | Accessibility audit Inline SVGs without accessible names medium | Error: 0 | Warnings: 93 93 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 93 URLs affected Target status: Inline SVGs without accessible names Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1, U1, U1

A | Check catalogue and all finding types

Finding/effect	Measurement and implementation
T113 | Performance and CWV Cache validator available (ETag or Last-Modified) low | Error: 60 | Warnings: 0 60 von 1.469 ausgewerteten URLs betroffen. If the pattern persists, the mobile user experience can remain weaker and important entries lose unnecessarily stability.	Measured: No / absent Target status: Yes / present Deliver ETag or Last-Modified to efficiently validate resources. Examples: U21, U22, U23
A11Y_REQUIRED_FIELD_HINTS | Accessibility audit Mandatory field information in forms low | Error: 0 | Warnings: 159 159 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 159 URLs affected Target status: Mandatory field information in forms Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1, U31, U41
X381 | Keyword & Topic Coverage Keyword Density: Repeat/Stuffing Risk high | Error: 0 | Warnings: 31 31 von 1.462 ausgewerteten URLs betroffen. If the pattern persists, multiple URLs can continue to compete for similar search terms and unnecessarily split SEO signals.	Determination: 31 URLs affected Target status: Keyword Density: Repeat/Stuffing Risk Reduce repeated exact terms or phrases. Formulate content more naturally, complement synonyms and real sub-topics instead of building keyword lists. Examples: U20, U114, U167
SP501 | Spam and reputation No spam terms in visible content high | Error: 0 | Warnings: 17 17 von 1.470 ausgewerteten URLs betroffen. If the signal persists, trust, browser perception or reputation signals can be further burdened.	Measured: Beispielspanne 1–4 Recommended: maximum 0 Remove compromised, foreign or inappropriate spam terms from visible content. For legitimate industries, check list of terms/industry context. Examples: U235, U526, U1016
SP506 | Spam and reputation No sitewide repeated spam patterns high | Error: 0 | Warnings: 17 17 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, relevant pages can be crawled worse, later indexed or incorrectly prioritized.	Determination: 17 URLs affected Target status: No sitewide repeated spam patterns When spam signals occur on multiple URLs or with repeated external domains: find source, clean up affected templates/content, check CMS/plugins and then re-crawl. Examples: U235, U526, U1016
A11Y_TABLE_HEADER_SCOPE | Accessibility audit Table headers with scope or ID low | Error: 0 | Warnings: 107 107 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 107 URLs affected Target status: Table headers with scope or ID Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U85, U85, U85
A11Y_ARIA_REFERENCE_MISSING | Accessibility audit ARIA references without target high | Error: 9 | Warnings: 0 9 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 9 URLs affected Target status: ARIA references without target Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U107, U107, U135

A | Check catalogue and all finding types

Finding/effect	Measurement and implementation
A11Y_TITLE_QUALITY | Accessibility audit Significant page title low | Error: 0 | Warnings: 81 81 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 81 URLs affected Target status: Significant page title Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U22, U23, U24
A11Y_ARIA_HIDDEN_FOCUSABLE | Accessibility audit Focusable elements in aria-hidden regions high | Error: 7 | Warnings: 0 7 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 7 URLs affected Target status: Focusable elements in aria-hidden regions Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1, U1462, U1462
A11Y_FIELDSET_LEGEND | Accessibility audit Radio groups and field sets without legend high | Error: 7 | Warnings: 0 7 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 7 URLs affected Target status: Radio groups and field sets without legend Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U98, U1462, U1463
A11Y_PLACEHOLDER_ONLY_LABELS | Accessibility audit Form fields only with placeholder medium | Error: 0 | Warnings: 29 29 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 29 URLs affected Target status: Form fields only with placeholder Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U98, U98, U98
L64 | Images and Media Responsive Images (srcset/sizes) low | Error: 0 | Warnings: 55 55 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, important content remains less accessible or internal signals are bundled weaker.	Measured: Beispielwert 1 Recommended: maximum 0 For responsive images use srcset/sizes. In the case of purely decorative or small assets consciously evaluate. Examples: U3, U4, U5
A11Y_REDUCED_MOTION | Accessibility audit Movement without a reduced-motion alternative medium | Error: 0 | Warnings: 27 27 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 27 URLs affected Target status: Movement without a reduced-motion alternative Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U2, U106, U168
A11Y_DUPLICATE_IDS | Accessibility audit Duplicate IDs high | Error: 5 | Warnings: 0 5 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 5 URLs affected Target status: Duplicate IDs Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1169, U1205, U1244

A | Check catalogue and all finding types

Finding/effect	Measurement and implementation
L70 | Internal linking Breadcrumbs are available low | Error: 0 | Warnings: 41 41 von 1.469 ausgewerteten URLs betroffen. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Measured: No / absent Target status: Yes / present Breadcrumb navigation or BreadcrumbList scheme. Examples: U53, U87, U88
SP507 | Spam and reputation overall inconspicuous risk of spam medium | Error: 0 | Warnings: 17 17 von 1.470 ausgewerteten URLs betroffen. If the signal persists, trust, browser perception or reputation signals can be further burdened.	Measured: Beispielspanne 3–12 Recommended: maximum 0 Evaluate the combined hits from content, links, URLs and HTML. Individual legitimate terms can be tolerated in an industry-specific manner, accumulated patterns should be corrected. Examples: U235, U526, U1016
X204 | Content & IA Near-Duplicate Templates: low variation despite different URLs high | Error: 0 | Warnings: 10 10 von 1.462 ausgewerteten URLs betroffen. If the pattern persists, relevant pages can be crawled worse, later indexed or incorrectly prioritized.	Determination: 10 URLs affected Target status: Near-Duplicate Templates: low variation despite different URLs Check page clusters with very similar structure/text. Reduce duplicates with consolidated content, canonical, or structured landing pages with real added value. Examples: U1038, U1130, U1135
H52 | Meta and SERP Avoid duplicate titles medium | Error: 0 | Warnings: 12 12 von 1.462 ausgewerteten URLs betroffen. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Determination: 12 URLs affected Target status: Avoid duplicate titles Title templates are clearer. Examples: U1084, U1085, U1155
X105 | Content & IA H1-Text Quality & Duplicate H1 site-wide medium | Error: 0 | Warnings: 12 12 von 1.462 ausgewerteten URLs betroffen. If the pattern persists, search intentions, snippets and side roles may remain unclear.	Determination: 12 URLs affected Target status: H1-Text Quality & Duplicate H1 site-wide For Auto: Save H1 text as fact + site-wide duplicate map in postprocess similar to H52/H53. Examples: U1084, U1085, U1155
A11Y_LINK_NAMES | Accessibility audit Links without or with weak link text medium | Error: 0 | Warnings: 11 11 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 11 URLs affected Target status: Links without or with weak link text Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1102, U1164, U1197
C03 | Crawling and indexing No noindex set high | Error: 0 | Warnings: 6 6 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, relevant pages can be crawled worse, later indexed or incorrectly prioritized.	Measured: Yes / present Target status: No / absent Remove noindex on indexable pages. Examples: U1462, U1463, U1464

A | Check catalogue and all finding types

Finding/effect	Measurement and implementation
A11Y_ARIA_REFERENCE_EMPTY | Accessibility audit ARIA references with empty target medium | Error: 0 | Warnings: 9 9 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 9 URLs affected Target status: ARIA references with empty target Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U107, U122, U122
A11Y_ARIA_EXPANDED_CONTROLS | Accessibility audit aria-expanded without control target low | Error: 0 | Warnings: 17 17 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 17 URLs affected Target status: aria-expanded without control target Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U120, U121, U175
A11Y_PDF_LINKS | Accessibility audit PDF links without a format note low | Error: 0 | Warnings: 16 16 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 16 URLs affected Target status: PDF links without a format note Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1, U4, U6
A11Y_BUTTON_TYPE | Accessibility audit Types of buttons in forms low | Error: 0 | Warnings: 16 16 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 16 URLs affected Target status: Types of buttons in forms Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U489, U491, U492
SP502 | Spam and reputation No spam terms in link texts high | Error: 0 | Warnings: 5 5 von 1.470 ausgewerteten URLs betroffen. If the signal persists, trust, browser perception or reputation signals can be further burdened.	Measured: Spanne 1–12 Recommended: maximum 0 Check eye-catching link text, especially in comments, footer links, widgets, and imported HTML blocks. Examples: U526, U1170, U1290
H53 | Meta and SERP Avoid duplicate descriptions medium | Error: 0 | Warnings: 6 6 von 1.462 ausgewerteten URLs betroffen. If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Determination: 6 URLs affected Target status: Avoid duplicate descriptions Description templates are more clear. Examples: U1084, U1085, U1155
X225 | Crawling and indexing Noindex pages are strongly linked internally (contradiction) medium | Error: 0 | Warnings: 6 6 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, relevant pages can be crawled worse, later indexed or incorrectly prioritized.	Determination: 6 URLs affected Target status: Noindex pages are strongly linked internally (contradiction) If pages are noindex, they should not be prominently linked internally. Check navigation/footer links, search pages, filter pages. Examples: U1462, U1463, U1464

If the result remains open, the visibility, technical quality or comprehensibility of the affected pages may remain further restricted.	Measured: No / absent Target status: Yes / present Set content security policy (mind. frame-ancestors/script-src), reduce XSS/clickjacking. Examples: U1469
A11Y_ABBR_TITLE | Accessibility audit Abbreviations explained low | Error: 0 | Warnings: 1 1 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 1 URL affected Target status: Abbreviations explained Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1141, U1141, U1141

A | Check catalogue and all finding types

Finding/effect	Measurement and implementation
A11Y_IMG_ALT_LONG | Accessibility audit Very long alternative texts low | Error: 0 | Warnings: 1 1 von 1.470 ausgewerteten URLs betroffen. If the pattern persists, usage hurdles for affected visitor groups and quality problems can continue to exist.	Determination: 1 URL affected Target status: Very long alternative texts Check affected elements and URLs in the accessibility module and correct them according to the WCAG recommendation mentioned there. Examples: U1
DSGVO_44 | GDPR and Tracking Audit Autocomplete deactivated for personal fields low | Error: 0 | Warnings: 1 Centrally Recognized as Consent/Tracking Configuration · applies at the website level. If the pattern persists, consent, tracking or trust signals can still seem unclear to users. Since it was detected system-wide, the cause is expected to remain centrally effective.	Determination: System-wide finding Target status: Autocomplete deactivated for personal fields Check affected services, URLs and consent signals in the module GDPR & Tracking and implement the recommendation mentioned there. Examples: U1, U4, U5

B | Accessibility, Core Web Vitals and GDPR

Complete stored test catalogues of the three additional modules, including passed tests. URL examples are examples from the stored scan. Automated pre-testing; the methodology and limits are described in the main section.

Accessibility | 76 Exams | Score: 17 | Checked URLs: 1471

Examples of URL: U1462, U1463, U1464, U1465, U1466, U1467
A11Y_FOCUS_OUTLINE_SUPPRESSED | Visible focus may be suppressed warn | Affected: 6	U1462: CSS unterdrückt sichtbare Fokus-Outline U1463: CSS unterdrückt sichtbare Fokus-Outline U1464: CSS unterdrückt sichtbare Fokus-Outline U1465: CSS unterdrückt sichtbare Fokus-Outline U1466: CSS unterdrückt sichtbare Fokus-Outline U1467: CSS unterdrückt sichtbare Fokus-Outline Remove outline:none only if an equivalent visible focus state is defined. Examples of URL: U1462, U1463, U1464, U1465, U1466, U1467
A11Y_INPUT_AUTOCOMPLETE | Autocomplete for personal input warn | Affected: 2	U927: autocomplete-Hinweis fehlt U927: autocomplete-Hinweis fehlt U927: autocomplete-Hinweis fehlt U967: autocomplete-Hinweis fehlt Add appropriate autocomplete values so that browsers and assistive technologies better recognize input purposes. Examples of URL: U927, U967
A11Y_ABBR_TITLE | Abbreviations explained warn | Affected: 1	U1141: Abkürzung ohne title-Erklärung U1141: Abkürzung ohne title-Erklärung U1141: Abkürzung ohne title-Erklärung U1141: Abkürzung ohne title-Erklärung Explain unusual abbreviations on the first appearance or via title/glossary context. Examples of URL: U1141
A11Y_SKIP_LINK_TARGETS | Jump and anchor links with missing target warn | Affected: 1	U54: Ankerziel fehlt: #check U54: Ankerziel fehlt: #faq U54: Ankerziel fehlt: #check Make sure that jump links and side anchors point to existing IDs. Examples of URL: U54
A11Y_HEADING_FIRST_LEVEL | First headline is not H1 warn | Affected: 3	U39: erste Überschrift ist H2 U1005: erste Überschrift ist H2 U1470: erste Überschrift ist H2 The first substantive heading should usually be the H1 and name the page purpose. Examples of URL: U39, U1005, U1470
A11Y_EMPTY_HEADINGS | Blank headings warn | Affected: 3	U128: leere Überschrift U944: leere Überschrift U1293: leere Überschrift Remove empty headings or fill them with meaningful text. Examples of URL: U128, U944, U1293
A11Y_IMG_ALT_LONG | Very long alternative texts warn | Affected: 1	U1: Alt-Text ist sehr lang: 169 Zeichen Keep alt texts concise and move longer descriptions into visible text or a detailed description. Examples of URL: U1

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
A11Y_HEADING_ORDER | Heading hierarchy warn | Affected: 1	U1349: Hierarchie-Sprung von H3 auf H6 Avoid jumps in the heading structure so that screen reader navigation remains logical. Examples of URL: U1349
A11Y_TABLE_HEADERS | Tables without header cells warn | Affected: 1	U1358: Datentabelle ohne th-Header Data tables need header cells so that relationships between rows and columns remain understandable. Examples of URL: U1358
A11Y_DOCTYPE_HTML5 | HTML5 doc type pass | Affected: 0	Take advantage of it! doctype html> at the beginning of the document so that browsers and assistive technologies work consistently in standard mode.
A11Y_HTML_LANG | HTML lang attribute pass | Affected: 0	Set a correct lang attribute, e.g. lang="de".
A11Y_LANG_FORMAT | Valid language code pass | Affected: 0	Use valid BCP-47 language codes such as de, de-DE or en.
A11Y_RTL_DIR | Writing direction for RTL languages pass | Affected: 0	For right-to-left languages, set a suitable writing direction above you="rtl" or you="auto".
A11Y_PAGE_TITLE | Page titles are available pass | Affected: 0	Each page needs a meaningful, unique title.
A11Y_META_REFRESH | Automatic forwarding or updating pass | Affected: 0	Avoid meta-refresh for automatic updates or forwarding; use server-side redirects and controllable updates.
A11Y_VIEWPORT_ZOOM | Mobile zoom not blocked pass | Affected: 0	Do not prevent users from being able to zoom on mobile devices.
A11Y_H1 | Unique H1 pass | Affected: 0	Use a clear headline per page.
A11Y_IMG_ALT_QUALITY | Generic or technical alt-texts pass | Affected: 0	Describe the purpose of the image instead of using file names or generic terms such as “image”.
A11Y_LABEL_FOR_MISSING | Labels with missing form target pass | Affected: 0	Label-for values must point to existing field IDs.
A11Y_EMPTY_LABELS | Empty labels pass | Affected: 0	Labels need recognizable text or a unique ARIA label.
A11Y_AUTOCOMPLETE_INVALID | Unusual Autocomplete Values pass | Affected: 0	Use standardized autocomplete tokens to recognize browser and assistive technologies input purposes.
A11Y_ARIA_INVALID_DESCRIPTION | Error fields without error message link pass | Affected: 0	Link fields in the error state with specific error messages per aria-describedby.
A11Y_FORM_ERROR_LIVE_REGION | Error messages without a live region pass | Affected: 0	Make sure that form errors are visible, linked to the field and are noticeable in a timely manner for screen readers.

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
A11Y_BUTTON_NAMES | Buttons without accessible names pass | Affected: 0	Icon buttons need visible text, aria-label or aria-labelledby.
A11Y_BLANK_LINK_REL | New tabs with explicit opener release pass | Affected: 0	Remove rel="opener" or set rel="noopener". Without an explicit opener, target="_blank" isolates the new window already.
A11Y_ARIA_LABEL_EMPTY | Empty aria-label attributes pass | Affected: 0	Remove empty aria label values or replace them with a meaningful label.
A11Y_INVALID_ARIA_STATE | Invalid ARIA conditions pass | Affected: 0	Check ARIA state and property values against the specification and remove invalid values.
A11Y_ARIA_LIVE_VALUE | ARIA-Live regions correctly declared pass | Affected: 0	Use aria-live exclusively off, polite or assertive and use live regions specifically for status messages.
A11Y_INVALID_ARIA_ROLE | Unknown ARIA roles pass | Affected: 0	Check role attributes against valid ARIA roles or use semantic HTML elements.
A11Y_ROLE_INTERACTIVE_FOCUS | Interactive ARIA roles not focusable pass | Affected: 0	Elements with interactive roles must be accessible and operable by keyboard.
A11Y_ROLE_IMG_NAME | role="img" without name pass | Affected: 0	Elements with role="img" need an accessible name, such as aria-label or aria-labelledby.
A11Y_DIALOG_NAME | Dialogues without accessible names pass | Affected: 0	Dialogues need a clear caption about aria-label or aria-labelledby.
A11Y_DIALOG_MODAL_STATE | Dialogues with modal status pass | Affected: 0	Clearly declare modal dialogues with aria-modal and check focus guidance, escape behavior and rebound after closing.
A11Y_ROLE_NONE_FOCUSABLE | Presentation roles on focusable elements pass | Affected: 0	Do not use role="none" or role="presentation" on focusable or interactive elements.
A11Y_POSITIVE_TABINDEX | Positive tab index pass | Affected: 0	Avoid positive tabindex values; the DOM order should determine the focus order.
A11Y_NONINTERACTIVE_CLICK | Clickable elements without keyboard operation pass | Affected: 0	Use native buttons/links or add role, focus ability and keyboard operation.
A11Y_TARGET_SIZE_INLINE | Small interactive targets from inline sizes pass | Affected: 0	Check touch and click targets for sufficiently large areas and distances, especially for icon buttons, links and form controls.
A11Y_IFRAME_TITLE | Iframes without title pass | Affected: 0	Describe embedded content by title attribute.

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
A11Y_IFRAME_TITLE_QUALITY | Significant iframe titles pass | Affected: 0	In the iframe-title, describe specifically which content is embedded, e.g. location map, booking form or product video.
A11Y_MEDIA_CAPTIONS | Audio/video without subtitle track pass | Affected: 0	Add subtitles, transcripts, or alternative content for audio and video content.
A11Y_MEDIA_TRANSCRIPT_HINT | Transcript notes for media pass | Affected: 0	For audio and video, offer transcripts, subtitles or a clearly findable text alternative.
A11Y_AUTOPLAY_MEDIA | Autoplay on audio or video pass | Affected: 0	Avoid automatically launching media with sound and provide visible control for pause, stop or volume.
A11Y_MOVING_CONTENT | Automatically moving or blinking content pass | Affected: 0	Remove flashing or automatically running content or provide a clear pause/stop option.
A11Y_MAIN_LANDMARK | Main Landmark pass | Affected: 0	Nutzen Sie genau einen Hauptbereich über <main> oder role="main".
A11Y_PAGE_LANDMARKS | Header and footer landmarks pass | Affected: 0	Use semantic header/footer areas or matching landmarks to help users capture main areas faster.
A11Y_NAV_LABELS | Multiple navigations without names pass | Affected: 0	Designate multiple navigations by aria-label or aria-labelledby, such as main navigation and footer navigation.
A11Y_REGION_NAMES | Designated regions and landmarks pass | Affected: 0	Name reused or special regions with aria-label or aria-labelledby so that they are comprehensible in landmark lists.
A11Y_DESCRIPTION_LIST_STRUCTURE | Description list structured correctly pass | Affected: 0	Structure dl lists with matching dt/dd elements so that the term and description remain connected by machine.
A11Y_DETAILS_SUMMARY | Details with Summary pass | Affected: 0	Start details elements with a meaningful summary so that the foldable content is easy to use.
A11Y_TABLE_CAPTION | Tables without description pass | Affected: 0	Describe complex tables with caption, aria label or a visible context.

Test / Status / Affected	Finding and recommendation
CWV_01 | TTFB and server response as LCP basis pass | Affected: 0	p75-TTFB im Crawl: 109 ms. No URL over 800 ms TTFB in the crawl. Prioritize server responses, redirects, caching before HTML, backend queries, and CDN configuration. For LCP, a low TTFB is the basis.
CWV_02 | Largest-contentful-paint risk indicators warn | Affected: 1453	140 URL(s) haben LCP-Readiness-Status warn/fail. No URL above 2 MB of known weight. 1453 URL(s) haben frühe Bilder ohne fetchpriority/preload-Signal. Durchschnittliches bekanntes Gewicht: 35 KB je URL. Optimize Hero Image, Critical CSS, Server Response, Preload/Fetch Priority, and Unneeded Resources per Template. In particular, suspected LCP images do not load lazy. Examples of URL: U1, U41, U43, U91, U107, U128, U179, U181, U544, U545, U546, U547, U548, U549, U550, U551, U552, U553, U554, U555, U556, U557, U558, U559, U560, U561, U562, U563, U564, U565, U566, U567, U568, U569, U570, U571, U572, U573, U574, U575, U576, U577, U578, U579, U580, U581, U582, U583, U584, U585, U586, U587, U588, U589, U590, U591, U592, U865, U900, U901, U915, U918, U919, U920, U921, U922, U923, U924, U925, U926, U927, U928, U929, U930, U931, U932, U933, U934, U935, U936, U937, U938, U939, U940, U941, U942, U943, U944, U946, U947, U948, U949, U950, U951, U952, U953, U954, U955, U956, U957, U958, U959, U960, U961, U962, U963, U964, U965, U966, U967, U968, U969, U970, U971, U972, U973, U974, U975, U976, U977, U978, U979, U980, U981, U982, U983, U984, U985, U986, U987, U988, U989, U990, U991, U1462, U1463, U1464, U1465, U1466, U1467, U2, U3, U4, U5, U6, U19, U20, U21, U22, U23, U24, U25, U26, U27, U28, U29, U30, U31, U32, U33, U34, U35, U36, U37, U38, U39, U40, U42, U44, U45, U46, U47, U48, U49, U50, U51, U52, U53, U54, U55, U56, U57, U58, U59, U60, U61, U62, U63, U64, U65, U66, U67, U68, U69, U70, U71, U72, U73, U74, U75, U76, U77, U78, U79, U80, U81, U82, U83, U84, U85, U86, U87, U88, U89, U90, U92, U93, U94, U95, U96, U97, U98, U99, U100, U101, U102, U103, U104, U105, U106, U108, U109, U110, U111, U112, U113, U114, U115, U116, U117, U118, U119, U120, U121, U122, U123, U124, U125, U126, U127, U129, U130, U131, U132, U133, U134, U135, U136, U137, U138, U139, U140, U141, U142, U143, U144, U145, U146, U147, U148, U149, U150, U151, U152, U153, U154, U155, U156, U157, U158, U159, U160, U161, U162, U163, U164, U165, U166, U167, U168, U169, U170, U171, U172, U173, U174, U175, U176, U177, U178, U180, U182, U183, U184, U185, U186, U187, U188, U189, U190, U191, U192, U193, U194, U195, U196, U197, U198, U199, U200, U201, U202, U203, U204, U205, U206, U207, U208, U209, U210, U211, U212, U213, U214, U215, U216, U217, U218, U219, U220, U221, U222, U223, U224, U225, U226, U227, U228, U229, U230, U231, U232, U233, U234, U235, U236, U237, U238, U239, U240, U241, U242, U243, U244, U245, U246, U247, U248, U249, U250, U251, U252, U253, U254, U255, U256, U257, U258, U259, U260, U261, U262, U263, U264, U265, U266, U267, U268, U269, U270, U271, U272, U273, U274, U275, U276, U277, U278, U279, U280, U281, U282, U283, U284, U285, U286, U287, U288, U289, U290, U291, U292, U293, U294, U295, U296, U297, U298, U299, U300, U301, U302, U303, U304, U305, U306, U307, U308, U309, U310, U311, U312, U313, U314, U315, U316, U317, U318, U319, U320, U321, U322, U323, U324, U325, U326, U327, U328, U329, U330, U331, U332, U333, U334, U335, U336, U337, U338, U339, U340, U341, U342, U343, U344, U345, U346, U347, U348,

Test / Status / Affected	Finding and recommendation
CWV_04 | Layout stability through image and embedded sizes warn | Affected: 187	187 URL(s) enthalten Bilder oder Embeds ohne stabile Breiten-/Höhenangaben. Reserve fixed dimensions or aspect ratio for images, iFrames, display areas and embedded components. Check fonts with font display and stable fallbacks. Examples of URL: U6, U21, U22, U23, U24, U53, U54, U55, U56, U57, U58, U59, U60, U61, U62, U85, U86, U92, U94, U95, U96, U97, U98, U99, U100, U101, U102, U103, U104, U105, U106, U107, U108, U109, U110, U111, U112, U113, U114, U115, U116, U117, U118, U119, U120, U121, U124, U127, U129, U130, U131, U132, U135, U139, U140, U141, U142, U143, U144, U145, U146, U147, U148, U149, U150, U151, U152, U153, U154, U155, U156, U157, U158, U159, U160, U161, U162, U163, U164, U166, U168, U170, U171, U172, U173, U174, U175, U176, U178, U180, U182, U184, U185, U186, U187, U188, U189, U190, U191, U192, U193, U194, U195, U196, U197, U198, U199, U200, U201, U202, U203, U204, U205, U206, U207, U208, U209, U210, U211, U212, U213, U214, U216, U217, U218, U219, U220, U221, U222, U223, U225, U226, U227, U312, U462, U463, U465, U466, U467, U468, U469, U470, U471, U472, U473, U474, U476, U477, U478, U479, U480, U481, U482, U483, U484, U485, U486, U526, U527, U528, U529, U530, U531, U532, U533, U534, U535, U536, U537, U538, U539, U540, U541, U542, U923, U945, U993, U994, U1035, U1088, U1177, U1201, U1205, U1313, U1411, U1468, U1471
CWV_05 | Render-blocking CSS and script resources pass | Affected: 0	Render-blockierende Kandidaten im Crawl: 3237. Keep critical CSS inline, load rest CSS later, use defer/modules for scripts and avoid synchronous third-party JavaScript.
CWV_06 | Page types with recurring performance patterns fail | Affected: 3	12 Template-Gruppe(n) wurden aus den geprüften URLs gebildet. Most striking group: /forum/google/:slug with Score 93 and 106 URL(s). 7 Gruppe(n) zeigen wiederkehrende CWV- oder Rendering-Risiken. Performance does not process URL by URL, but bundle by page type: fix common components, hero images, CSS/JS packages and tracking per template. Examples of URL: U1027, U1029, U1032
CWV_07 | Cache control, compression and static assets pass | Affected: 0	No large HTML response without recognizable compression. Measured resources mostly have cache signals. Activate Brotli/Gzip, set long cache times for versioned assets and deliberately deliver HTML short or revalidable.
CWV_08 | External Hosts, Tags and Waterfall Risk warn | Affected: 0	7 Drittanbieter-Host(s): 4stats.de, www.fairlinked.de, bilder.kabinettfoto.de, ultima-project.net, www.rl-fotoshooting.de, www.fewothiessow.de, stimm-sprachseminare.de. Prioritize third-party providers by benefit, check consent/tag triggers, delay non-critical tags, and use preconnect only in a targeted manner.
CWV_09 | Status codes and forwardings pass | Affected: 0	All measured URLs were reachable. No forwarding chains in the measured URL set. p75 total time for HTML responses: 111 ms. Lead sitemap URLs directly to canonical HTTPS destinations, shorten forwarding chains and remove error pages from crawl/landing page lists.

Test / Status / Affected	Finding and recommendation
CWV_10 | HTML document size warn | Affected: 7	7 URL(s) mit mehr als 250 KB HTML. Durchschnittliches bekanntes HTML-/Ressourcen-Gewicht: 35 KB je URL. Reduce server-side HTML, inline data, oversized tables, unneeded markup blocks, and embedded JSON data. Examples of URL: U1161, U1462, U1463, U1464, U1465, U1466, U1467
CWV_11 | JavaScript weight per URL pass | Affected: 0	Not a noticeable known JavaScript weight. Bekanntes JavaScript gesamt: 1104 KB. Split JavaScript by page/component type, remove unused libraries, and don’t move critical interactions backwards.
CWV_12 | CSS weight and inline CSS warn | Affected: 6	Not a very high known CSS weight. 6 URL(s) mit mehr als 120 KB Inline-CSS. Remove unused CSS, separate critical CSS from layout/component CSS, and avoid heavily bloated inline-style blocks. Examples of URL: U1462, U1463, U1464, U1465, U1466, U1467
CWV_13 | Image weight and image number warn | Affected: 1	Not a very high known image weight. 1 URL(s) mit mehr als 40 Bild-Elementen. Compress images, use modern formats, responsive sizes and only load non-visible image sections as needed. Examples of URL: U139
CWV_14 | Number of external and internal resources pass | Affected: 0	No URL with a very high number of resources. Erkannte Ressourcen im Crawl: 5767. Reduce requests with fewer global assets, smaller components, targeted lazy loading, and more critical third-party selection.
CWV_15 | Hero image loads lazy pass | Affected: 0	No lazy loaded first image in the tested set. Load the alleged LCP/Hero image directly and move Lazy Loading to images below the first viewport.
CWV_16 | Hero image priority and preload warn | Affected: 1453	1453 URL(s) mit frühen Bildern ohne fetchpriority/preload-Signal. For the most important visible image, check fetchpriority="high", preload, or a template-specific prioritization. Examples of URL: U1, U2, U3, U4, U5, U6, U19, U20, U21, U22, U23, U24, U25, U26, U27, U28, U29, U30, U31, U32, U33, U34, U35, U36, U37, U38, U39, U40, U41, U42, U43, U44, U45, U46, U47, U48, U49, U50, U51, U52, U53, U54, U55, U56, U57, U58, U59, U60, U61, U62, U63, U64, U65, U66, U67, U68, U69, U70, U71, U72, U73, U74, U75, U76, U77, U78, U79, U80, U81, U82, U83, U84, U85, U86, U87, U88, U89, U90, U91, U92, U93, U94, U95, U96, U97, U98, U99, U100, U101, U102, U103, U104, U105, U106, U107, U108, U109, U110, U111, U112, U113, U114, U115, U116, U117, U118, U119, U120, U121, U122, U123, U124, U125, U126, U127, U128, U129, U130, U131, U132, U133, U134, U135, U136, U137, U138, U139, U140, U141, U142, U143, U144, U145, U146, U147, U148, U149, U150, U151, U152, U153, U154, U155, U156, U157, U158, U159, U160, U161, U162, U163, U164, U165, U166, U167, U168, U169, U170, U171, U172, U173, U174, U175, U176, U177, U178, U179, U180, U181, U182, U183, U184, U185, U186, U187, U188, U189, U190, U191, U192, U193, U194, U195, U196, U197, U198, U199, U200, U201, U202, U203, U204, U205, U206, U207, U208, U209, U210, U211, U212, U213, U214, U215, U216, U217, U218, U219, U220, U221, U222, U223, U224, U225, U226, U227, U228, U229, U230, U231, U232, U233, U234, U235, U236, U237, U238, U239, U240, U241, U242, U243, U244, U245, U246, U247, U248, U249, U250, U251,

CWV_19 | iFrames and Embeds without Size pass | Affected: 0	iFrames signal stable dimensions or do not occur. For maps, videos, forms and widgets, make a reservation for fixed areas so that late loading does not create layout jumps.
CWV_20 | Webfonts without font display pass | Affected: 0	No @font-face rules without font-display recognized in the inline CSS. Set font display, reduce font variations, and check fallback metrics to make text appear faster and more stable.

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
CWV_21 | DOM complexity warn | Affected: 11	11 URL(s) mit mehr als 1.500 DOM-Knoten. Reduce nested components, duplicated layout blocks, long lists, and invisible DOM fragments. Examples of URL: U2, U91, U139, U1161, U1348, U1462, U1463, U1464, U1465, U1466, U1467
CWV_22 | Third-party scripts per URL pass | Affected: 0	Third-party scripts look slim in the verified set. Load marketing, chat, A/B testing and tracking scripts only as needed, by consensus and if possible without render/interaction blockade.
CWV_23 | Inline JavaScript and event handlers pass | Affected: 0	Inline JavaScript doesn’t look too big. Bundle inline JavaScript, remove synchronous legacy loads and move event logic into modern, asynchronous modules.
CWV_24 | Preload strategy for critical resources warn | Affected: 1458	1458 URL(s) mit frühen Bildern, CSS- oder Font-Signalen ohne Preload-Kandidaten. Use preload specifically for hero images, critical fonts, or central style sheets, but avoid broadly distributed preload lists. Examples of URL: U1, U2, U3, U4, U5, U6, U19, U20, U21, U22, U23, U24, U25, U26, U27, U28, U29, U30, U31, U32, U33, U34, U35, U36, U37, U38, U39, U40, U41, U42, U43, U44, U45, U46, U47, U48, U49, U50, U51, U52, U53, U54, U55, U56, U57, U58, U59, U60, U61, U62, U63, U64, U65, U66, U67, U68, U69, U70, U71, U72, U73, U74, U75, U76, U77, U78, U79, U80, U81, U82, U83, U84, U85, U86, U87, U88, U89, U90, U91, U92, U93, U94, U95, U96, U97, U98, U99, U100, U101, U102, U103, U104, U105, U106, U107, U108, U109, U110, U111, U112, U113, U114, U115, U116, U117, U118, U119, U120, U121, U122, U123, U124, U125, U126, U127, U128, U129, U130, U131, U132, U133, U134, U135, U136, U137, U138, U139, U140, U141, U142, U143, U144, U145, U146, U147, U148, U149, U150, U151, U152, U153, U154, U155, U156, U157, U158, U159, U160, U161, U162, U163, U164, U165, U166, U167, U168, U169, U170, U171, U172, U173, U174, U175, U176, U177, U178, U179, U180, U181, U182, U183, U184, U185, U186, U187, U188, U189, U190, U191, U192, U193, U194, U195, U196, U197, U198, U199, U200, U201, U202, U203, U204, U205, U206, U207, U208, U209, U210, U211, U212, U213, U214, U215, U216, U217, U218, U219, U220, U221, U222, U223, U224, U225, U226, U227, U228, U229, U230, U231, U232, U233, U234, U235, U236, U237, U238, U239, U240, U241, U242, U243, U244, U245, U246, U247, U248, U249, U250, U251, U252, U253, U254, U255, U256, U257, U258, U259, U260, U261, U262, U263, U264, U265, U266, U267, U268, U269, U270, U271, U272, U273, U274, U275, U276, U277, U278, U279, U280, U281, U282, U283, U284, U285, U286, U287, U288, U289, U290, U291, U292, U293, U294, U295, U296, U297, U298, U299, U300, U301, U302, U303, U304, U305, U306, U307, U308, U309, U310, U311, U312, U313, U314, U315, U316, U317, U318, U319, U320, U321, U322, U323, U324, U325, U326, U327, U328, U329, U330, U331, U332, U333, U334, U335, U336, U337, U338, U339, U340, U341, U342, U343, U344, U345, U346, U347, U348, U349, U350, U351, U352, U353, U354, U355, U356, U357, U358, U359, U360, U361, U362, U363, U364, U365, U366, U367, U368, U369, U370, U371, U372, U373, U374, U375, U376, U377, U378, U379, U380, U381, U382, U383, U384, U385, U386, U387, U388, U389, U390, U391, U392, U393, U394, U395, U396, U397, U398, U399, U400, U401, U402, U403, U404, U405, U406, U407, U408, U409, U410, U411, U412, U413, U414, U415, U416, U417, U418, U419, U420, U421, U422, U423, U424, U425, U426, U427, U428, U429, U430, U431,

CWV_26 | HTTP/1.1 for many resources pass | Affected: 0	No conspicuous HTTP/1.1/Request aggregation. Check HTTP/2 or HTTP/3, CDN configuration, and request bundling if many resources are shipped in parallel.
CWV_27 | p75 total time of HTML response pass | Affected: 0	p75-Gesamtzeit: 111 ms; p90-Gesamtzeit: 125 ms. No URL over 2,500 ms total time. Optimize DNS/TLS, backend, redirects, HTML generation, and early resources before visual LCP optimizations take hold.
CWV_28 | URLs with low performance score pass | Affected: 0	No URL with a performance score below 70. Sort weak URLs by template and fix the recurring components instead of optimizing individual URLs in isolation.
CWV_29 | Viewport meta for mobile performance pass | Affected: 0	Viewport meta is present on the tested URLs. Set a clean Viewport meta tag to make mobile layouts, rendering, and core web hospitals rating work more stable.

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
CWV_30 | Script loading strategy async/defer/module pass | Affected: 0	Script loading strategy appears inconspicuous in the tested set. Do not load critical scripts with defer, async or type="module" and check old synchronous bundle integrations.
CWV_31 | Stylesheet number per URL pass | Affected: 0	Stylesheet number does not seem striking. Consolidate global CSS files, remove unused styles and load page type-specific CSS in a more targeted manner.
CWV_32 | Render-blocking CSS per URL warn | Affected: 80	80 URL(s) mit mehr als vier render-blockierenden Stylesheets. Extract critical CSS and move less important style sheets so that the first render starts faster. Examples of URL: U41, U43, U181, U919, U920, U921, U922, U923, U924, U925, U926, U927, U928, U929, U930, U931, U932, U933, U934, U935, U936, U937, U938, U939, U940, U941, U942, U943, U944, U946, U947, U948, U949, U950, U951, U952, U953, U954, U955, U956, U957, U958, U959, U960, U961, U962, U963, U964, U965, U966, U967, U968, U969, U970, U971, U972, U973, U974, U975, U976, U977, U978, U979, U980, U981, U982, U983, U984, U985, U986, U987, U988, U989, U990, U1462, U1463, U1464, U1465, U1466, U1467
CWV_33 | Responsive images with srcset/sizes pass | Affected: 0	Responsive image signals are inconspicuous. Use srcset and sizes for content images so that mobile devices do not load unnecessarily large image files.
CWV_34 | Modern image formats warn | Affected: 2	2 URL(s) mit vielen JPEG/PNG/GIF-Bildsignalen. Check WebP/AVIF, matching image sizes and responsive delivery, especially for product, hero and gallery images. Examples of URL: U139, U1205
CWV_35 | CSS background images in rendering pass | Affected: 0	No striking accumulation of CSS background images. Check if important visible images can be shipped as real img/picture elements with sizes, priority and alternative text.
CWV_36 | Lazy loading for long picture lists warn | Affected: 1	1 URL(s) mit vielen späteren Bildern ohne loading=\"lazy\". Load image sections below the first viewport lazy without delaying the suspected LCP/Hero image. Examples of URL: U1205
CWV_37 | Preload with as-attribute pass | Affected: 0	Preload attributes work completely. At preload, always set the correct as value so that the browser can determine priorities and cache behavior cleanly.
CWV_38 | Font preload with crossorigin pass | Affected: 0	Font preloads are not noticeable. For font preloads, add crossorigin and see if only critical fonts are prioritized.
CWV_39 | Too many preloads per page pass | Affected: 0	No noticeable preload accumulation. Prioritize only a few truly critical resources; too many preloads can worsen browser prioritization.
CWV_40 | Preconnect hygiene pass | Affected: 0	Preconnect signals are targeted. Remove speculative preconnects to unused hosts and keep only early, really needed connections.
CWV_41 | Server timing for slow pages pass | Affected: 0	Server timing is not missing on conspicuously slow URLs or is not relevant. Add server timing for backend, cache, and template phases to help you locate TTFB issues faster.

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
CWV_42 | Cache Validators for HTML warn | Affected: 3	3 größere HTML-Antwort(en) ohne ETag/Last-Modified-Signal. Use ETag or Last-Modified if HTML is to be shipped in a revalidable manner and match this with cache control. Examples of URL: U992, U1005, U1470
CWV_43 | Charset Recognizable Early pass | Affected: 0	Charset signals are present or not conspicuous. Define UTF-8 early via content type or meta charset so that the browser can process HTML securely and without reparse.
CWV_44 | Avoid CSS @import pass | Affected: 0	No @import signals found in the inline CSS. Replace CSS @import with direct bundled stylesheets or build steps to avoid additional render dependencies.

Gemessene Serverantwort und technische LCP-/INP-/CLS-Risikobewertung. Dieselbe Antwort wie im SEO-Crawl; keine zusätzlichen Browser- oder Nutzermessungen.

DSGVO_06 | External or Unsafe Form Actions warn | Affected: 456	No external form targets found. Forms with GET method or without method on 456 page(s). Avoid GET for personal form data, check external form endpoints and send form data exclusively via HTTPS. Examples of URL: U25, U26, U27, U28, U29, U30, U31, U32, U33, U34, U35, U36, U37, U38, U39, U40, U41, U42, U43, U44, U45, U46, U47, U48, U49, U50, U51, U52, U93, U96, U97, U98, U99, U100, U101, U107, U108, U109, U110, U111, U112, U113, U114, U115, U116, U117, U118, U119, U120, U121, U122, U123, U124, U125, U126, U127, U128, U129, U130, U131, U132, U133, U134, U135, U136, U137, U138, U175, U176, U177, U178, U179, U180, U181, U182, U183, U312, U326, U464, U466, U467, U468, U469, U470, U471, U472, U473, U475, U477, U478, U479, U480, U481, U482, U483, U484, U485, U486, U487, U489, U491, U492, U493, U494, U495, U496, U497, U498, U527, U601, U602, U603, U604, U605, U606, U607, U608, U609, U610, U611, U612, U613, U614, U615, U616, U617, U618, U619, U620, U621, U622, U623, U624, U625, U626, U627, U628, U629, U630, U631, U632, U633, U634, U635, U636, U637, U638, U639, U640, U641, U642, U643, U644, U645, U646, U647, U648, U649, U650, U651, U652, U653, U654, U655, U656, U657, U658, U659, U660, U661, U662, U663, U664, U665, U666, U667, U668, U669, U670, U671, U672, U673, U674, U675, U676, U677, U678, U679, U680, U681, U682, U683, U684, U685, U686, U687, U688, U689, U690, U691, U692, U693, U694, U695, U696, U697, U698, U699, U700, U701, U702, U703, U704, U705, U706, U707, U708, U709, U710, U711, U712, U713, U714, U715, U716, U717, U718, U719, U720, U721, U722, U723, U724, U725, U726, U727, U728, U729, U730, U731, U732, U733, U734, U735, U736, U737, U738, U739, U740, U741, U742, U743, U744, U745, U746, U747, U748, U749, U750, U751, U752, U753, U754, U755, U756, U757, U758, U759, U760, U761, U762, U763, U764, U765, U766, U767, U768, U769, U770, U771, U772, U773, U774, U775, U776, U777, U778, U779, U780, U781, U782, U783, U784, U785, U786, U787, U788, U789, U790, U791, U792, U793, U794, U795, U796, U797, U798, U799, U800, U801, U802, U803, U804, U805, U806, U807, U808, U809, U810, U811, U812, U813, U814, U815, U816, U817, U818, U819, U820, U821, U822, U823, U824, U825, U826, U827, U828, U829, U830, U831, U832, U833, U834, U835, U836, U837, U838, U839, U840, U841, U842, U843, U844, U845, U846, U847, U848, U849, U850, U851, U853, U854, U855, U856, U857, U858, U859, U860, U861, U862, U863, U864, U900, U901, U918, U919, U920, U921, U922, U923, U924, U925, U926, U927, U928, U929, U930, U931, U932, U933, U934, U935, U936, U937, U938, U939, U940, U941, U942, U943, U944, U945, U946, U947, U948, U949, U950, U951, U952, U953, U954, U955, U956, U957, U958, U959, U960, U961, U962, U963, U964, U965, U966, U967, U968, U969, U970, U971, U972, U973, U974, U975, U976, U977, U978, U979, U980, U981, U982, U983, U984, U985, U986, U987, U988, U989, U990, U1005, U1360, U1462, U1463, U1464, U1465, U1466, U1467, U1470
DSGVO_07 | External embeddings and scripts warn | Affected: 0	No typical external embeddings detected. 7 externe Ressourcen-Hosts insgesamt, 11 externe Ressourcen-Referenzen. Reduce external embeddings, check local alternatives for fonts/assets, and document each third party.

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
DSGVO_08 | International Providers and Transfer Risks pass | Affected: 0	No typical international provider signals recognized. Clarify per provider AVV, recipient, data categories, third country transfer, standard contractual clauses, storage periods and presentation in the data protection declaration.
DSGVO_09 | Google Consent Mode and Tag Control pass | Affected: 0	No Google tracking signals found. No clear consent-mode signal found. If Google tags are used, check Consent Mode, default states, CMP integration, and tag firing before consent.
DSGVO_10 | Cookie and storage signals pass | Affected: 0	No direct cookie or storage signals found in static HTML. Check which cookies or browser memories are set before and after consent and whether they are described in the data protection declaration.
DSGVO_11 | Mixed content and uncertain resources fail | Affected: 8	8 http-Ressource(n) gefunden. Replace http resources and insecure form targets with HTTPS to avoid data leakage, browser alerts, and consent/trust issues. Examples of URL: http://4stats.de/de/stats?id=51642&cntr=hide, http://www.fairlinked.de/files/facebook.jpg, http://bilder.kabinettfoto.de/schauspieler/schauspieler01asset.jpg, http://ultima-project.net/images/mod_seitenreport.png, http://ultima-project.net/images/stories/downloads/mod_seitenreport_j-1.7.jpg, http://www.rl-fotoshooting.de/images/fotoshooting-titelbild.jpg, http://www.fewothiessow.de/ferienwohnung-ruegen/punkt.gif, http://stimm-sprachseminare.de/wp-content/uploads/2012/01/anne-mareike.jpg
DSGVO_12 | Tag Manager, Data Layer and Purpose Retention pass | Affected: 0	No tag manager signal detected. Keep a tag list with Purpose, Category, Trigger, Consent Category, Owner, and Change Date. Check whether tags fire only after appropriate consent.
DSGVO_13 | Day size and purpose limitation pass | Affected: 0	The tag scope appears slim in static HTML. Delete unneeded tags, consolidate vendors, and document purpose, category, and those responsible for each service.
DSGVO_14 | Data protection link coverage per page pass | Affected: 0	A data protection signal was found on all the pages tested. 1470 Seite(n) mit erkennbarem Datenschutzsignal. Make sure that the privacy policy is clearly accessible on each relevant URL, in the footer and close to the form.
DSGVO_15 | Imprint link coverage per page pass | Affected: 0	An imprint signal was found on all tested pages. Link the imprint stably in the global layout so that users and reviewers find it regardless of the page type.
DSGVO_16 | Cookie and consent text can be found pass | Affected: 0	Cookie or consent terms can be found on relevant pages. Ensure that cookie/consent notices can be found clearly in the banner, in the data protection declaration or in cookie settings.
DSGVO_17 | Rejection Option in Consent Flow pass | Affected: 0	Reject/necessary signals were found on relevant pages. Check whether users can reject unnecessary tags as easily as they can accept them and whether the reject option is immediately visible.
DSGVO_18 | Consent settings and preferences achievable pass | Affected: 0	Setting/preference signals were found on relevant pages. Make consensus categories and preferences reachable so users can understand and granularly control individual purposes.

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
DSGVO_19 | Revocation and cookie settings permanently achievable pass | Affected: 0	Revocation or cookie settings are technically findable. Offer subsequent cookie settings or a revocation link permanently reachable, typically in the footer or data protection area.
DSGVO_20 | Personal input fields warn | Affected: 101	101 Seite(n) mit personenbezogenen Eingabefeldern, insgesamt 103 Feld(er). For personal fields, check purpose, mandatory information, data protection notice, storage period, recipients and server-side processing. Examples of URL: U4, U5, U19, U63, U64, U65, U66, U67, U68, U69, U70, U71, U72, U73, U74, U75, U76, U77, U78, U79, U80, U81, U82, U83, U84, U87, U88, U89, U90, U106, U174, U526, U543, U544, U545, U546, U547, U548, U549, U550, U551, U552, U553, U554, U555, U556, U557, U558, U559, U560, U561, U562, U563, U564, U565, U566, U567, U568, U569, U570, U571, U572, U573, U574, U575, U576, U577, U578, U579, U580, U581, U582, U583, U584, U585, U586, U587, U588, U589, U590, U591, U592, U903, U927, U967, U1006, U1007, U1008, U1009, U1010, U1011, U1012, U1013, U1014, U1462, U1463, U1464, U1465, U1466, U1467, U1471
DSGVO_21 | Newsletter or marketing forms warn | Affected: 12	12 Seite(n) mit Newsletter-/Marketingformular-Signalen. Check double opt-in, provider, purpose limitation, consent text, logging and log-out option. Examples of URL: U4, U88, U90, U108, U927, U957, U1462, U1463, U1464, U1465, U1466, U1467
DSGVO_22 | Login or password fields pass | Affected: 0	No password fields found in static HTML. In addition, check login forms for HTTPS, session cookies, password manager compatibility, data protection notices and security headers.

B | Accessibility, Core Web Vitals and GDPR

Test / Status / Affected	Finding and recommendation
DSGVO_23 | Forms with GET method warn | Affected: 456	456 Seite(n) mit Formularen per GET oder ohne explizite Methode. Do not send personal data via URL query. Use POST and check whether tracking or logging systems could collect form data. DSGVO_24 | Many Hidden Fields in Forms warn | Affected: 90	90 Seite(n) mit auffällig vielen Hidden Fields; insgesamt 776 Hidden Field(s). Check hidden fields for campaign, user, session or CRM data and avoid unnecessary sharing with third parties. Examples of URL: U4, U5, U19, U63, U64, U65, U66, U67, U68, U69, U70, U71, U72, U73, U74, U75, U76, U77, U78, U79, U80, U81, U82, U83, U84, U89, U106, U174, U526, U543, U544, U545, U546, U547, U548, U549, U550, U551, U552, U553, U554, U555, U556, U557, U558, U559, U560, U561, U562, U563, U564, U565, U566, U567, U568, U569, U570, U571, U572, U573, U574, U575, U576, U577, U578, U579, U580, U581, U582, U583, U584, U585, U586, U587, U588, U589, U590, U591, U592, U903, U1006, U1007, U1008, U1009, U1010, U1011, U1012, U1013, U1014, U1471
DSGVO_25 | External script hosts pass | Affected: 0	No external script hosts found. Invent external script hosts, clarify purpose and consent category, and download non-necessary scripts only after consent.
DSGVO_26 | Many external resources per page pass | Affected: 7	No page with a striking amount of external resources. 7 externe Host(s) insgesamt. Reduce external resources, bundle providers and check whether all integrated services are covered in the data protection declaration. Examples of URL: U1035, U1088, U1177, U1201, U1336, U1411, U1459
DSGVO_27 | Preconnect and DNS prefetch to third-party providers pass | Affected: 0	No external preconnect/DNS prefetch signals found. Use preconnect/DNS prefetch only for really necessary providers and see if early third-party connections can be avoided before Consent.
DSGVO_28 | Fonts, Maps, Videos and Captcha Embeddings pass | Affected: 0	No typical external embedments such as fonts, cards, videos or captcha detected. Check data protection-friendly embedding modes, two-click solutions, local fonts and suitable information in the data protection declaration.
DSGVO_29 | Heatmap and session recording tools pass | Affected: 0	No typical heatmap or session recording signals detected. In the case of heat map and recording tools, especially check consent, masking of personal content, storage duration and provider agreements.
DSGVO_30 | CRM and marketing automation tags pass | Affected: 0	No typical CRM/marketing automation tags detected. For CRM/marketing tags, clarify data categories, recipients, purpose, consent triggers, form coupling and documentation.
DSGVO_31 | Payment and checkout scripts pass | Affected: 0	No typical payment scripts detected. Check checkout scripts for necessary integration, data protection information, recipients, payment provider documentation and loading time effect.
DSGVO_32 | External Google fonts signals pass | Affected: 0	No external Google fonts signals found. Check local font delivery, purpose, legal basis and documentation in the privacy policy.
DSGVO_33 | YouTube embeds without no-cookie mode pass | Affected: 0	No regular YouTube Embeds found. Use data-saving embedding options, two-click solutions or youtube-nocookie and document the integration.
DSGVO_34 | Maps and Captcha resources pass | Affected: 0	No maps resources detected. Check whether Maps and Captcha are loaded only as required or as agreed, and whether the provider, purpose and data transmission are documented.

H | Additional queried keyword ideas

Keyword ideas are a separate query for a selected starting term. Here are the last results saved for this audit run, without further reduction.

There are no separate keyword ideas stored for this run. The stored content keywords and competition opportunities are listed in Appendix F and G.

Keyword / Intent	Search volume	CPC	Competition

I | Change history and KPI comparison

Comparison with the previous suitable audit of the same website, according to the selection in the web view. Different crawl scope can change the number of affected URLs.

No previous suitable comparison run is available for this run.

J | Internal link strength and distribution

Full link force distribution per URL from the same evaluation as in the web view. The Link Force Index is an internal structural value; it is not a Google PageRank. U numbers: Annex C.

Internal edges: 52097 | Orphaned pages: 226 | Weak Pages: 287 | Link Force Loss: 7
